

SIMANF{}R

Forest management simulator

Aitor Vázquez Veloso

February 2025

- Harvest criteria and intensity
- Individual tree models harvests
 - Thinning from below, from above and systematic
 - Thinning with future trees
 - Thinning by species (mix stands)
- Stand models harvests
- Minimum and maximum harvest age

- Thinning criteria
 - Density (trees/ha)
 - Basal area (m^2/ha)
 - Volume (m^3/ha)
- Thinning intensity
 - % of the thinning criteria (from 0 to 100%)

Individual tree models harvests

Thinning from below

Individual tree models harvests

Thinning from above

Individual tree models harvests

Thinning (from above) with future trees

- `preserve_trees`: % of larger trees on which
no action is to be taken

Individual tree models harvests

Systematic thinning

Individual tree models harvests

Systematic thinning with future trees

- `preserve_trees`: % of larger trees on which
no action is to be taken

Individual tree models harvests

Thinning by species

- `species`: species code (SFN1)
- `volume_target`: what does the thinning intensity apply to?
 - Plot
 - Species

Individual tree models harvests

Thinning by species

- `species`: species code (SFNI)
- `volume_target`: what does the thinning intensity apply to?
 - Plot
 - Species

Stand models harvests

Minimum and maximum harvest age

- *min_age*: minimum age of the stand to be cut/projected (years)
- *max_age*: maximum age of the stand to be cut/projected (years)

Minimum and maximum harvest age

- *min_age*: minimum age of the stand to be cut/projected (years)
- *max_age*: maximum age of the stand to be cut/projected (years)

Minimum and maximum harvest age

Age = 18 years

Age = 22 years

Age = 28 years

- *min_age*: minimum age of the stand to be cut/projected (years)
- *max_age*: maximum age of the stand to be cut/projected (years)

Minimum and maximum harvest age

Age = 18 years

Age = 22 years

Age = 28 years

Min_age = 20 years

Max_age = 25 years

- *min_age*: minimum age of the stand to be cut/projected (years)
- *max_age*: maximum age of the stand to be cut/projected (years)

Minimum and maximum harvest age

- *min_age*: minimum age of the stand to be cut/projected (years)
- *max_age*: maximum age of the stand to be cut/projected (years)
