

Model for Quercus petraea North Palencia (Spain)

Model

Qpetraea Palencia

Static individual tree model for Quercus petraea in Palencia (Spain)

Model description

- \bullet Species: $Quercus\ petraea$ (Matt.), Liebl..
- Species SFNI (Spanish Forest National Inventory) code: 42
- Geographical area: North Palencia
- Geographical area (administrative): Cervera de Pisuerga (Palencia)

Model requirements and recommended use

- Initial inventory requirements: age and dominant height of the plot; expan and dbh of the trees
- Geographical area: north Palencia, closer places and another places with similar characteristics (assuming differences)
- Stand type: mixed stands
- Execution recommended time: xx years executions (survival, growth and ingrowth equations developed by using that criteria)
- Site Index is defined as top height at a base age of xx years
